

The background image shows a laptop screen with a blurred dashboard. The dashboard features a line graph at the top with two data series: 'New Visitor' (dark blue) and 'Returning Visitor' (light green). The 'New Visitor' line shows a general upward trend with some fluctuations, while the 'Returning Visitor' line is more stable. Below the graph is a pie chart, also with dark blue and light green segments. The text 'USOS' is overlaid on the left side of the screen in a large, white, sans-serif font.

## Przykładowy kod po stronie UI - fillLastGrades

```
async fillLastGrades(userId: number) {
  this.lastGrades = [];

  try {
    const subjectsMap = await this.userService.getAllUsersSubjects(userId);
    const allGrades: { name: string, grade: number, date: Date }[] = [];

    for (const [groupId, subjects] of subjectsMap.entries()) {
      for (const subject of subjects) {
        try {
          const grades = await this.userService.getUsersGradesFromSubject(userId, subject.id);

          grades.forEach(grade => {
            allGrades.push({
              name: subject.subjectName,
              grade: this.userService.parseGradeValue(grade.value),
              date: grade.timestamp
            });
          });
        } catch (error) {
          console.error(`Błąd podczas ładowania ocen dla przedmiotu ${subject.subjectName} (grupa ${groupId}):`, error);
        }
      }
    }

    const sortedGrades = allGrades.sort((a, b) => b.date.getTime() - a.date.getTime());

    this.lastGrades = sortedGrades.slice(0, 5);
  } catch (error) {
    console.error('Błąd podczas ładowania ostatnich ocen:', error);
  }
};
```

## Przykładowy kod po stronie UI - fillEvents

```
async fillEvents() {
  try {
    const schedule = await this.userService.getUserSchedule();
    console.log(schedule);
    const scheduleSlots = [
      { slot: 1, start: "08:00", end: "08:45", top: "5px", height: "50px" },
      { slot: 2, start: "08:55", end: "09:40", top: "60px", height: "50px" },
      { slot: 3, start: "09:50", end: "10:35", top: "115px", height: "50px" },
      { slot: 4, start: "10:45", end: "11:30", top: "170px", height: "50px" },
      { slot: 5, start: "11:40", end: "12:25", top: "225px", height: "50px" },
      { slot: 6, start: "12:45", end: "13:30", top: "280px", height: "50px" },
      { slot: 7, start: "13:40", end: "14:25", top: "335px", height: "50px" },
      { slot: 8, start: "14:35", end: "15:20", top: "390px", height: "50px" },
    ];

    this.weekEvents = { 1: [], 2: [], 3: [], 4: [], 5: [] };

    schedule.forEach((event) => {
      const slotInfo = scheduleSlots.find((slot) => slot.slot === event.slot);

      if (slotInfo) {
        this.weekEvents[event.dayOfWeek].push({
          eventInfo: event,
          time: `${slotInfo.start} - ${slotInfo.end}`,
          start: slotInfo.start,
          end: slotInfo.end,
          top: slotInfo.top,
          height: slotInfo.height
        });
      }
    });
  } catch (error) {
    console.error("Błąd przy ładowaniu planu zajęć", error);
  }
}
```

## Przykładowy kod po stronie UI - getAllUsersSubjects

```
async getAllUsersSubjects(userId: number): Promise<Map<number, Array<SchoolSubject>>> {  
  const url = `${this.userUrl}/${userId}/student/groups`;   
  const userGroups = await this.getAllUserGroupIds(userId);  
  const subjects = new Map<number, Array<SchoolSubject>>();  
  
  for (const groupId of userGroups) {  
    try {  
      const response = await lastValueFrom(this.http.get<getSubjectResponse[]>(`${url}/${groupId}/subjects`, { withCredentials: true }));  
      const tempSubjects = response.map(element => SchoolSubject.fromApiResponse(element));  
      subjects.set(groupId, tempSubjects);  
    } catch (error) {  
      console.error(`Błąd ładowania danych groupId ${groupId}:`, error);  
    }  
  }  
  
  return subjects;  
}
```
